
The Grand Tour

In the past "Grand Tour" was the name of the journey that the European noblemen and rich bourgeois took in Italy, to discover its ancient beauty and its incomparable richness of arts and culture. It was more than a simple tour or a passing fashion, it became a fundamental moment in the cultural training of every cultivated European. To this end, we put at your disposal highly trained guides that will make you discover in an involving way the artistic beauties of our country in a new light. Besides, they will make you discover the less known treasures usually ignored by mass tourism. We organize theme itineraries - "tailored" on demand -, private guided tours to monuments and museums, attendance to traditional events, and much more.
